

Outside Your Rig

- Ensure all items in exterior compartments are secure
- Lock all exterior compartment doors
- If you are traveling with a bike rack ensure your rack and bicycles are securely attached
- Disconnect power cord, water hoses and other cables and store them securely
- Drain & store sewer hose
- Drain holding tanks as required (A good rule of thumb is to leave enough fresh water you'll need between destinations)
- Ensure sewer drain valves are closed
- Roll-in and secure awning
- Pack-up all outside items (mats, chairs, grill, etc) and ensure they are securely stored
- Close front and/or rear window shutters
- Turn off gas water heater
- Put jacks up / store portable jacks
- Remove and store wheel chocks & levelers
- Check air pressure in all tires and adjust as required
- Check the lug nuts on all wheels to ensure they are in good condition and secure
- Check all engine fluid levels
- Check all your lights (brake, signal, etc)
- When hitching up check the following:
 - Hitch / Towing system
 - Breakaway cable
 - Sway bars
 - Spring bars
- Check your electric brakes
- Check campsite to ensure it's clean and no items are left behind
- Pull up and secure steps

Inside Your Rig

- Secure all loose items (toaster, dishes, coffee pot, etc)
- Place travel bars inside refrigerator & lock door
- Turn off water pump
- Turn off water heater
- Secure all doors, drawers and cabinet doors
- Lower roof antenna / satellite system
- Lower roof vents
- Switch refrigerator to gas operation or turn off (If you turn your appliances off also turn the gas supply off at the tank or bottles)
- Turn off air conditioner / furnace
- Put in and secure the slide-outs
- Close windows
- Secure blinds / drapes
- Shut off all gas pilot lights

Perform a final walk-around outside of your rig to ensure you haven't missed anything.
